Drinking Fountain Wall Mounted With WRAS Approved Tap (Non-Chilled)

Product Code: DFWH-WRAS

WRAS Compliant Drinking Water Fountains - Wall Mounted

Product Code DFWH-WRAS

The WRAS compliant drinking fountains are manufactured from 16 gauge grade 304 stainless steel for extra strength and durability. The wall mounted design offers the flexibility to mount the drinking water fountain at any height to suit the age of the users.

The drinking water bubbler tap has been tested and approved by the WRAS Water Research Advisory Scheme to ensure it complies with the Water Supply (Water Fittings) Regulations or Scottish Byelaws.

The tap is operated by a press button which opens a self closing timed flow valve and prevents the waste of water. The tap is conveniently located on the side of the fountain making it easier for users to drink without banging their heads.

The round front edge and 1.6mm thick material help prevent damage, and safeguard the users from injury associated with sharp edges and corners.

Supplied with a concealed wall bracket, WRAS approved tap, and waste fitting, this fountain provides you with a complete cost effective solution to provide drinking water, whilst ensuring you meet or exceed any water fittings regulations.

To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

Dimensions & Specifications:

Width: 305mm.
Depth: 350mm from wall.
Height: 150mm plus 75mm rear upstand.

Material: 1.6mm thick - Stainless steel - grade 304.
