Wall Recessed Bottle Filler (Non-Chilled)

Product Code: RMBF

Recessed Bottle Filling Unit

Product Code RMBF

The wall recessed bottle filling fountains are designed to be recessed into the wall to ensure the unit doesn't encroach into the room. The vandal resistant design ensures installation into high traffic areas without supervision should not cause concern. The bottle filling unit is designed with a large aperture to suit most popular sizes of re-usable water bottles.

To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

Dimensions & Specifications:

Width: 351mm
