Floorstanding Adult Bottle Filling Fountain (Non-Chilled)

Product Code: FSBFF-A

Floorstanding Adult Height Bottle Filling Fountain

Product Code FSBFF-A

The stainless steel adult floorstanding bottle fountain provides a strong, attractive, easily cleaned solution for delivering drinking water.

The WRAS approved push button bottle filling swan neck tap is located away from the back wall, making it easier for the user to fill cups and bottles. The self-closing valve prevents water wastage.

Manufactured from 1.6mm thick grade 304 stainless steel with a full adult height shroud, the bottle and cup filling station is very robust and resistant to vandalism. The rounded front provides safety for users, whilst the full height shroud allows for the water pipes and waste to be concealed.

With a high polished bowl, the adult height bottle filling station is easily maintained ensuring a long-lasting finish. The smooth radius design helps prevent injuries associated with sharp corners, and along with the 30mm rear upstand aids cleaning which improves hygiene. The compact design allows the bottle filler station to be easily installed in any suitable location.

To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

Dimensions & Specifications:

Width: 360mm.
Depth: 380mm from wall.
Height: 915mm plus 30mm rear upstand.
