Wall Mounted Shrouded Bottle Filling Station (Non-Chilled)

Product Code: DFWHS-CF

Shrouded Bottle Filling Fountain - Wall Mounted

Product Code DFWHS-CF

The shrouded bottle and cup filling station is wall mounted and designed to facilitate dispensing drinking water into cups and bottles. Refilling reusable bottles helps users with daily ongoing hydration, and helps the environment by reducing reliance on disposable water bottles.

The chrome plated swan neck filler has a press button self closing valve, which ensures water is only dispensed when the button is depressed, and water is saved.

The shrouded bottle filler is manufactured from heavy duty 1.6mm thick grade 304 stainless steel with a half height undershroud, the bottle filling fountain is neat, tidy and extremely robust. Pipework is accessed through a removable access panel in the base which is retained by security screws. Polished to a satin finish and without open joints, the unit is easy to clean whilst the curved front design protects users and passers by from risk of injury.

This vandal resistant bottle filling station is small, compact and ideal for supplying drinking water in schools, colleges and public buildings.

To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

Dimensions & Specifications:

Width: 305mm.
Depth: 350mm from wall.
Height: 245mm high plus 75mm rear upstand.
Bottle filler height: Spout height 247mm - 290mm overall height.
