Adult Height Bottle Filling Fountain (Non-Chilled)

Product Code: DFFSA-CF

Adult Height Bottle Filling Station

Product Code DFFSA-CF

The stainless steel adult height bottle and cup filling fountain is wall and floor mounted and provides a strong, attractive, easily cleaned solution for delivering drinking water.

The press button time flow swan neck filler is located away from the back wall making it easier for the user to fill cups and bottles. The self closing valve prevents water wastage.

Manufactured from 1.6mm thick grade 304 stainless steel with a full adult height shroud the bottle and cup filling station is very robust and resistant to vandalism. The removable shroud conceals the waste and supply pipework for extra vandal resistance and safety and is retained by security screws.

Polished to a satin finish the adult height bottle filling station is easily maintained ensuring a long lasting finish. The smooth radius design helps prevent injuries associated with sharp corners, and along with the 75mm rear upstand aids cleaning which improves hygiene. The compact design allows the bottle filler station to be easily installed in any suitable location.

Providing accessible drinking water promotes hydration leading to better health, and improved mental performance in schools and the workplace.

To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.
