

Junior Height Bottle Filling Fountain

Product Code: DFFSJ-CF

Junior Height Bottle Filling Fountain

Product Code DFFSJ-CF

The cup and bottle filling station is wall and floor mounted at junior height, and provides a safe solution for younger children to refill water bottles and cups.

The timed flow filler is activated by press button which turns off when released preventing water wastage. The self closing valve allows younger users to use the filler fountains unsupervised without the risk of leaving the tap running.

The junior height bottle filling fountains and shrouds are produced from grade 304 1.6mm thick stainless steel for durability and resistance to vandalism. The removable shroud is held on with security screws and conceals the waste and supply pipework for safety.

Polished to a satin finish the junior height bottle and cup filling station is easily cleaned, whilst the smooth radius design helps prevent injury associated with sharp corners.

The bottle filling fountain provides easy access to safe drinking water, where younger children are able to re-fill their sports bottles, promoting the benefits of hydration at an early age.

To ensure the proper functioning and longevity of this unit, a Y-strainer must be installed as part of the water supply system. The Y-strainer is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer will result in the warranty being void.

Dimensions & Specifications:

Width: 305mm.

Depth: 350mm from wall.

Height: 760mm plus 75mm rear upstand.

Cup and Bottle Filler height: Spout height 247mm - 290mm overall height.
