

Foot Pedal Bottle Fillers

Product Code: DFWHCF-PEDAL

Foot Pedal Bottle Filling Fountains

Product Code DFWHCF-PEDAL

Stainless steel foot operated bottle filling fountains. The stainless steel bottle filling fountain has a hands free operation with a WRAS approved foot valve. The foot valve has a water saving on / off operation preventing the water running on when the foot valve is released. The foot operated valve can either be wall mounted or floor mounted by simply turning the foot lever around. The swan neck bottle filling tap is WRAS approved and has no button for true hands free operation of the bottle filling fountain. In today's climate no touch bottle filling fountains offer a safe source of drinking water whilst reducing the risk of cross contamination from users all touching the same surface.
