Junior Height Drinking Fountain With WRAS Apporved Tap (Non-Chilled)

Product Code: DFFSJ-WRAS

WRAS Compliant Junior Height Drinking Water Fountains

Product Code DFFSJ-WRAS

The WRAS compliant junior height drinking fountains attach to the floor and wall with an undershroud to conceal the pipework.

The junior drinking water fountains are supplied complete with a WRAS approved tap that has a self-closing valve to ensure it turns off after use. The approved tap has been tested and approved to ensure it complies completely with the Water Supply (Water Fittings) Regulations or Scottish Byelaws by the Water Research Advisory Scheme (WRAS).

The water fountains are produced with smaller children in mind at a height of 760mm to ensure ease of use. The tap is safely located away from the back wall to prevent users banging their heads, and the shroud conceals the pipework for safety.

The floor standing drinking fountains are fabricated from 1.6mm thick grade 304 stainless steel for safety and vandal resistance. The compact design allows the fountain to be easily installed whilst not taking up too much floor space.

To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

Dimensions & Specifications:

Width: 305mm.
Depth: 350mm from wall.
Height: 762mm plus 75mm rear upstand.

Material: Grade 304, 1.6mm thick stainless steel.
