Concrete Outdoor Drinking Fountain (Non-Chilled)

Product Code: GUF99-UK

Freestanding Outdoor Concrete Drinking Fountains

Product Code GUF99-UK

The concrete outdoor drinking fountain is ideal for parks, golf courses and seaside locations where the provision of drinking water is required. The concrete construction makes the fountain vandal resistant whilst blending in with most environments. The stainless steel bowl and stainless steel drinking fountain bubbler tap are easily maintained and suitable for outside use.

To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

Specification:

Body Material: Reinforced concrete with brown aggregate finish.

Bowl Material: 1.2mm thick polished stainless steel bowl.

Bubbler tap: Stainless steel drinking valve operated by a front mounted self closing button (requires 6 x AA batteries).

Standard: WRAS approved water fittings.
